SSIS PRODUCTIVITY PACK

KingswaySoft
www.kingswaysoft.com

The **SSIS Productivity Pack** is a collection of premium SSIS components that enable an improved SSIS ETL development experience with greater potential. These components expand on native SSIS components to offer more robust features and bring new enhancements to SSIS to enable integration scenarios previously not achievable without custom scripting.

KEY FEATURES

- A premium pack of the most advanced ETL components in the industry to help make SSIS more powerful.
- Eliminates the need for custom scripts for common complex requirements.
- Saves time and offers significantly greater potential when implementing solutions using SSIS.
- Empowers developers to achieve more in SSIS in a more productive fashion.
- Currently includes over 300 premium and unique components with more to come.

Technical Requirements: Azure SQL, Microsoft SQL Server 2022, 2019, 2017, 2016, 2014, or 2012.

PREMIUM DATA FLOW COMPONENTS

PREMIUM ADO.NET
Premium ADO.NET Source offers greater metadata handling and additional features to read from virtually any database.
Premium ADO.NET Destination enables writing to a database with Insert, Update, Delete or Upsert write actions as well as many other additional features.
Premium ADO.NET Command Task run commands to a database instance directly at control flow level.

PREMIUM AGGREGATE
Perform an aggregate operation on the input columns, and group them to a data set.

PREMIUM CONVERSION
A transformation component that can be used to convert or make changes to the data type of input columns.

PREMIUM DERIVED COLUMN
Expands on the functionality of the standard SSIS Derived Column to include over 225 functions and an advances expression editor.

PREMIUM EXCEL
Includes enhanced Excel **Connection Manager, Source & Destination** components. Supports both 32 and 64-bit runtimes with greater flexibility when reading and writing to an Excel file.

PREMIUM LOOKUP
Combines the functionality of the out-of-box Lookup and Fuzzy Lookup components into one simplified, easy to use component without any limitations including the ability to use any data input as the lookup source.

PREMIUM SERVICE LOOKUP
Search for rows in a lookup object based on fields from rows in a primary input and perform lookup against data sources.

PREMIUM ODATA
Includes enhanced Excel **Connection Manager, Source & Destination** components. Supports both 32 and 64-bit runtimes with greater flexibility when reading and writing to a Premium OData file.

PREMIUM SLOWLY CHANGING DIMENSION
An enhanced version of the standard Slowly Changing Dimension component, can process three types of slowly changing dimensions: Fixed Attributes, Changing Attributes, and Historical Attributes.

PREMIUM RECORDSET SOURCE
Allows to extract data from within record sets from object variables.

PREMIUM TASK COMPONENTS

PREMIUM EXPRESSION TASK
Evaluate an expression and assign the result to a variable during runtime.

PREMIUM FILE PROPERTIES TASK
Read and update the properties of a file from a path.

PREMIUM FILE WATCHERTASK
Monitor a folder based on a condition if required, and trigger/write to output based on any change.

BIG DATA

CDM
Includes **Source & Destination** components to faciliate reading and writing from CDM data.

EDI
Includes **Source & Destination** components to retrieve data from an EDI file, supports 1000's of different EDI format and version types, such as **HL7**, **X12**, **EDIFACT**, **EANCOM**, **VDA**, **HIPPA**, **Telco** and **NCPDP Script**.

HADOOP CONNECTION MANAGER
Used to establish a connection to Hadoop from witin SSIS.

HDFS
Includes **Source & Destination** components to faciliate reading and writing from HDFS.

POWER BI
Includes **Connection Manager, Source & Destination** components to facilitate connecting to and reading and writing to/from Power BI.

PREMIUM DATA FILE
Use the Premium Data File component to read and retrieve data from an **Avro**, **ORC** or a **Parquet** file.

TABLEAU HYPER
Includes **Connection Manager, Source, Destination and Publish Task** components to facilitate connecting to and reading and writing to/from Tableau Hyper.

CLOUD STORAGE

AMAZON S3 STORAGE
Includes **Connection Manager, Source & Destination** components to facilitate connecting to and reading and writing from Amazon S3 Storage.

AZURE BLOB STORAGE
Includes **Connection Manager, Source & Destination** components to facilitate connecting to and reading and writing to/from Azure Blob Storage.

AZURE DATA LAKE
Includes **Connection Manager, Source & Destination** components to facilitate connecting to and reading and writing to/from Azure Data Lake.

AZURE FILES
Includes **Connection Manager, Source & Destination** components to facilitate connecting to and reading and writing to/from Azure FIles.

BOX
Includes **Connection Manager, Source & Destination** components to facilitate connecting, reading, & writing to/from Box.

DROPBOX
Includes **Connection Manager, Source & Destination** components to facilitate connecting, reading, & writing to/from Dropbox.

GOOGLE CLOUD STORAGE
Includes **Connection Manager, Source & Destination** components to facilitate connecting, reading, & writing to/from Google Cloud Storage.

GOOGLE DRIVE
Includes **Connection Manager, Source & Destination** components to facilitate connecting, reading, & writing to/from Google Cloud Storage.

ONEDRIVE
Includes **Connection Manager, Source & Destination** components to facilitate connecting, reading, & writing to/from OneDrive.

Conversion Components

Composition
Combine/merge multiple rows into one row based on the key field value.

Decomposition
Split the input values into multiple rows and duplicate the other columns' values as well.

Value Mapping
Use the Value Mapping component to manage translation of input values.

Data Generation and Anonymization

Data Anonymizer
Transformation component which allows you to anonymize or mask your sensitive data.

Data Spawner
Generates random sample data easily using many different data types.

JSON & XML Processing

JSON Source
Used to retrieve JSON documents from an HTTP URL or local file and break up the JSON structure to produce column data.

JSON Extract
A transformation component that receives JSON from an upstream component and extracts data to produce column data.

JSON Extract Task
A transformation component that receives JSON from an upstream component and extracts data to produce column data.

JSON Merge
A transformation component which can be used to merge data into JSON documents.

JSON Destination
Merge input data into JSON structure and output it to a file or send it to an HTTP URL.

XML Source
Retrieve XML documents from an HTTP URL or local file and break up the XML structure to produce column data.

XML Extract
A transformation component that receives JSON from an upstream component and extracts data to produce column data.

XML Extract Task
A transformation component that receives JSON from an upstream component and extracts data to produce column data.

XML Merge
A transformation component which can be used to merge data into XML format.

XML Destination
Merge input data into XML structure and output it to a file or send it to an HTTP URL.

HTML Table Source
Used to retrieves an HTML document from an HTTP request or a local file and extract a table element into column data.

Data Quality and Comparison

Address Parser
Extract the address details from free form text.

Address Verification
Establish connections with various address verification services, verify the accuracy of address data and provide corrections.

Data Profiler
Used to analyze data and to compare rows from upstream data sources. Results of the data analysis are sent to the additional "DataProfiler Output."

Diff Detector
Used to compare two source inputs to find out the exact differences. Rows are matched using a business key (single or composite key) to determine if the incoming rows are new, unchanged, changed, or deleted rows.

Duplicate Detector
Used to compare rows within a data source and identify duplicate rows. Offers several common matching types to handle unique requirements.

Data Quality and Comparison

Data Spawner
The Data Spawner component is a source component that is used to generate random data.

Data Anonymizer
The Data Anonymizer component is a transformation component used to mask data.

Google Services

Google Ads
Includes a **Connection Manager** and **Source** components to facilitate connecting to and retrieving data from Google AdWords.

Google AlloyDB
Includes a **Connection Manager, Source, Destination & Command Task** components to facilitate connecting to and retrieving data from Google AlloyDB.

Google Analytics
Includes a **Connection Manager** and **Source** components to facilitate connecting to and retrieving data from Google Analytics.

Google BigQuery
Includes **Connection Manager, Source & Destination** components to facilitate connecting to and retrieving & writing data from/to Google BigQuery.

Google Calendar
Includes a **Connection Manager** and **Source & Destination** components to facilitate connecting to and retrieving data from Google Calendar.

Google Cloud Storage
Includes a **Connection Manager** and **Source & Destination** components to facilitate connecting to and retrieving data from Google Cloud Storage.

Google Cloud SQL
Includes a **Connection Manager** and **Source & Destination** components to facilitate connecting to and retrieving data from Google Cloud SQL.

Google Drive
Includes a **Connection Manager** and **Source & Destination** components to facilitate connecting to and retrieving data from Google Forms.

Google Forms
Includes a **Connection Manager** and **Source & Destination** components to facilitate connecting to and retrieving data from Google Drive.

Google Maps
Includes a **Connection Manager** and **Source & Destination** components to facilitate connecting to and retrieving data from Google Maps.

Google People Components
Includes **Connection Manager & Source** components to facilitate connecting to and reading and writing to/from Google People.

Google Search Console Components
Includes **Connection Manager & Source** components to facilitate connecting to and reading and writing to/from Google Search Console.

Google Sheets
Includes **Connection Manager, Source & Destination** components to facilitate connecting to and retrieving & writing data from/to Google Sheets.

Google Tag Manager Components
Includes **Connection Manager & Source** components to facilitate connecting to and reading and writing to/from Google Maps.

YouTube Analytics
Includes a **Connection Manager** and **Source** components to facilitate connecting to and retrieving data from Google Drive.

Template Merge

HTML Merge
A transformation component which can merge column and variable data using a pre-defined HTML template.

Text Merge
Data Flow Transformation Component which can merge column and variable data using a pre-defined text template.

Encryption and Compression Tasks

Compression Task
Allows you to compress or decompress .zip files in the Control Flow.

PGP Encryption Task
Control flow task that can be used to perform Encrypt, Decrypt, CreateSignature or VerifySignature actions on a file.

Premium Hash
A SSIS data flow transformation component that can be used to hash any input data.

Mail Components

Email Components
Includes **Connection Manager, Source & Destination** components to facilitate connecting to and retrieve emails from an IMAP, POP3, or Exchange Web Services Email server.

SMTP Components
SMTP Connection Manager, Destination, & Task facilitates connections to an SMTP server to send emails within SSIS.

Marketing Intelligence

Bing Ads

Includes a **Connection Manager, Destination** and **Source Component** to facilitate connecting to and retrieving data from Bing Ads.

Message Queue Components

Premium Message Queue Task

Send or receive messages to or from message queues.

ActiveMQ

Connection Manager, Source & Destination components facilitate connecting to and reading & writing to/from ActiveMQ.

AMQP

Connection Manager, Source & Destination components facilitate connecting to and reading & writing to/from AMQP.

Amazon SQS

Connection Manager, Source & Destination components facilitate connecting to and reading & writing to/from Amazon SQS.

Azure Service Bus

Connection Manager, Source & Destination components facilitate connecting to and reading & writing to/from Azure Service Bus.

Azure Queue Storage

Connection Manager, Source & Destination components facilitate connecting to and reading & writing to/from Azure Queue Storage.

Kafka

Connection Manager, Source & Destination components facilitate connecting to and reading & writing to/from Kafka.

IBM MQ

Connection Manager, Source & Destination components facilitate connecting to and reading & writing to/from IBM MQ/WebSphere MQ.

MQTT

Connection Manager, Source & Destination components facilitate connecting to and reading & writing to/from MQTT.

MSMQ

Connection Manager, Source & Destination components facilitate connecting to and reading & writing to/from MSMQ.

RabbitMQ

Connection Manager, Source & Destination components facilitate connecting to and reading & writing to/from RabbitMQ.

SMPP

Connection Manager, Source & Destination components facilitate connecting to and reading & writing to/from SMPP.

NoSQL Components

Amazon DynamoDB

Connection Manager, Source & Destination components facilitate connecting to and reading & writing to/from Amazon DynamoDB server. Supports Insert, Update, Upsert, or Delete write actions.

Apache Cassandra

Connection Manager, Source & Destination components facilitate connecting to and reading & writing to/from Apache Cassandra. Supports Insert, Update, Upsert, or Delete write actions.

Azure Table

Connection Manager, Source & Destination components facilitate connecting to and reading & writing to/from Azure Table.

Couchbase

Connection Manager, Source & Destination components facilitate connecting to and reading & writing to/from Couchbase.

CosmosDB

Connection Manager, Source & Destination components facilitate connecting to and reading & writing to/from CosmosDB server. Supports Insert, Replace, Update or Delete write actions with the option to use Upsert on Replace and Update actions.

Elasticsearch

Connection Manager, Source & Destination components facilitate connecting to and reading & writing to/from Elasticsearch.

MongoDB

Connection Manager, Source & Destination components facilitate connecting to and reading & writing to/from MongoDB server. Supports Insert, Replace, Update or Delete write actions with the option to use Upsert on Replace and Update actions.

Redis

Connection Manager, Source & Destination components facilitate connecting to and reading & writing to/from Redis server.

Premium File Pack

FTPS Connection Manager

Facilitates connecting to an FTPS server.

SFTP Connection Manager

Facilitates connection to an SFTP server.

SMB Connection Manager

Facilitates connection to an SMB server.

Premium File System Components

Premium File System Source & Destination support reading or writing data from/to a file system through local, FTP, FTPS or SFTP connections. Includes item selection modes to retrieve the desired sub items.

Premium Flat File

- **Premium Flat File Source & Destination** support reading or writing data from/to a flat file from specified server.
- Supports FTPS, SFTP, OneDrive, Dropbox, Box, Amazon S3, Azure Blob Storage, SharePoint & local connections.

Premium File Transfer Task

- Support for 4 actions: Send Files, Delete Files, Create Directory, and Remove Directory.
- Supports FTPS, SFTP, OneDrive, Dropbox, Box, Amazon S3, Azure Blob Storage, SharePoint & local connections.

WebDAV

Connection Manager, Source & Destination support reading, extracting, or writing data from/to a WebDAV instance.

HTTP/Web Service Components

AS2 Connection Manager

- Web Service comes with an SSIS connection manager component that can be used to establish AS2 Connections.

HTTP Connection Manager

- Used to establish a connection to an HTTP website.
- Supports access to SOAP or REST-based web services.

HTTP Requester

- Data flow pipeline component that can be used to send a series of HTTP requests and process their responses.
- Supports optional query string parameters.

HTTP Requester Task

- Control flow task component that can be used to send an HTTP request and receive a response.
- Supports optional query string parameters
- Options to output the response body to a variable or file.

GraphQL

- Includes **Connection Manager, Source & Destination** components to facilitate connecting to and reading and writing to/from GraphQL.

Microsoft Graph

- Includes **Connection Manager, Source & Destination** components to facilitate connecting to and reading and writing to/from Microsoft Graph.

Web Service

- **Web Service Source** supports reading data from virtually any SOAP based service endpoint. Option to specify input parameters. Support for custom SOAP headers.
- **Web Service Destination** supports writing data using web service interfaces by targeting virtually any SOAP based service endpoint. Supports custom SOAP headers
- **Web Service Task** is a control flow component that can be used to read/retrieve data from a web service. Option to specify input parameters. Options to output the response body to a variable or file.

REST Components

Act-On Components

Includes **Connection Manager, Source & Destination** components to facilitate connecting to and reading and writing to/from Act-On.

ActiveCampaign Components

Includes **Connection Manager, Source & Destination** components to facilitate connecting to and reading and writing to/from ActiveCampaign.

Acumatica Components

Includes **Connection Manager, Source & Destination** components to facilitate connecting to and reading and writing to/from Acumatica.

ADP Components

Includes **Connection Manager, Source & Destination** components to facilitate connecting to and reading and writing to/from ADP.

Airtable Components
Includes **Connection Manager, Source & Destination** components to facilitate connecting to and reading and writing to/from Airtable.

Asana Components
Includes **Connection Manager, Source & Destination** components to facilitate connecting to and reading and writing to/from Asana.

Authorize.Net Components
Includes **Connection Manager, Source & Destination** components to facilitate connecting to and reading and writing to/from Authorize.Net.

Auth0 Components
Includes **Connection Manager, Source & Destination** components to facilitate connecting to and reading and writing to/from Auth0.

Azure App Insights Components
Includes **Connection Manager, Source & Destination** components to facilitate connecting to and reading and writing to/from Azure App Insights.

Azure Table Components
Includes **Connection Manager, Source & Destination** components to facilitate connecting to and reading and writing to/from Azure Table.

BambooHR Components
Includes **Connection Manager, Source & Destination** components to facilitate connecting to and reading and writing to/from BambooHR.

Basecamp Components
Includes **Connection Manager, Source & Destination** components to facilitate connecting to and reading and writing to/from Basecamp.

Blackbaud Components
Includes **Connection Manager, Source & Destination** components to facilitate connecting to and reading and writing to/from Blackbaud.

BigCommerce Components
Includes **Connection Manager, Source & Destination** components to facilitate connecting to and reading and writing to/from BigCommerce.

Calendly Components
Includes **Connection Manager, Source & Destination** components to facilitate connecting to and reading and writing to/from Calendly.

Chargebee Components
Includes **Connection Manager, Source & Destination** components to facilitate connecting to and reading and writing to/from Chargebee.

Chargify Components
Includes **Connection Manager, Source & Destination** components to facilitate connecting to and reading and writing to/from Chargify.

Ceridian Dayforce Components
Includes **Connection Manager, Source & Destination** components to facilitate connecting to and reading and writing to/from Ceridian Dayforce.

ClickUp Components
Includes **Connection Manager, Source & Destination** components to facilitate connecting to and reading and writing to/from ClickUp.

Constant Contact Components
Includes **Connection Manager, Source & Destination** components to facilitate connecting to and reading and writing to/from Constant Contact.

Copper Components
Includes **Connection Manager, Source & Destination** components to facilitate connecting to and reading and writing to/from Copper.

Discord Components
Includes **Connection Manager, Source & Destination** components to facilitate connecting to and reading and writing to/from Discord.

DocuSign Components
Includes **Connection Manager, Source & Destination** components to facilitate connecting to and reading and writing to/from DocuSign.

Duo Security Components
Includes **Connection Manager, Source & Destination** components to facilitate connecting to and reading and writing to/from Duo Security.

Drift Components
Includes **Connection Manager, Source & Destination** components to facilitate connecting to and reading and writing to/from Drift.

Dynamics 365 CE Components
Includes **Connection Manager, Source & Destination** components to facilitate connecting to and reading and writing to/from Microsoft Dynamics 365 Customer Insights.

eBayComponents
Includes **Connection Manager, Source & Destination** components to facilitate connecting to and reading and writing to/from eBay.

Elasticsearch Components
Includes **Connection Manager, Source & Destination** components to facilitate connecting to and reading and writing to/from Elasticsearch.

Emarsys Components
Includes **Connection Manager, Source & Destination** components to facilitate connecting to and reading and writing to/from Emarsys.

Emfluence Components
Includes **Connection Manager, Source & Destination** components to facilitate connecting to and reading and writing to/from Emfluence.

Eventbrite Components
Includes **Connection Manager, Source & Destination** components to facilitate connecting to and reading and writing to/from Eventbrite.

Expensify Components
Includes **Connection Manager, Source & Destination** components to facilitate connecting to and reading and writing to/from Expensify.

Extensiv Components
Includes **Connection Manager, Source & Destination** components to facilitate connecting to and reading and writing to/from Extensiv.

Facebook Business Components
Includes **Connection Manager, Source & Destination** components to facilitate connecting to and reading and writing to/from Facebook Business.

Facebook Messenger Components
Includes **Connection Manager, Source & Destination** components to facilitate connecting to and reading and writing to/from Facebook Messenger.

FreshBooks Components
Includes **Connection Manager, Source & Destination** components to facilitate connecting to and reading and writing to/from FreshBooks.

Freshdesk Components
Includes **Connection Manager, Source & Destination** components to facilitate connecting to and reading and writing to/from Freshdesk.

Freshsales Components
Includes **Connection Manager, Source & Destination** components to facilitate connecting to and reading and writing to/from Freshsales.

Freshservice Components
Includes **Connection Manager, Source & Destination** components to facilitate connecting to and reading and writing to/from Freshservice.

GitHub Components
Includes **Connection Manager, Source & Destination** components to facilitate connecting to and reading and writing to/from GitHub.

Google Calendar Components
Includes **Connection Manager, Source & Destination** components to facilitate connecting to and reading and writing to/from Google Calendar.

Google Forms Components
Includes **Connection Manager, Source & Destination** components to facilitate connecting to and reading and writing to/from Google Forms.

Google Maps Components
Includes **Connection Manager & Source** components to facilitate connecting to and reading and writing to/from Google Maps.

Google People Components
Includes **Connection Manager & Source** components to facilitate connecting to and reading and writing to/from Google People.

Google Search Console Components
Includes **Connection Manager & Source** components to facilitate connecting to and reading and writing to/from Google Search Console.

Google Tag Manager Components
Includes **Connection Manager & Source** components to facilitate connecting to and reading and writing to/from Google Maps.

GoToWebinar Components
Includes **Connection Manager, Source & Destination** components to facilitate connecting to and reading and writing to/from GoToWebinar.

Infusionsoft (Keap) Components
Includes **Connection Manager, Source & Destination** components to facilitate connecting to and reading and writing to/from Infusionsoft.

Insightly Components
Includes **Connection Manager, Source & Destination** components to facilitate connecting to and reading and writing to/from Insightly.

Jira Components
Includes **Connection Manager, Source & Destination** components to facilitate connecting to and reading and writing to/from Jira.

LinkedIn Business Components
Includes **Connection Manager, Source & Destination** components to facilitate connecting to and reading and writing to/from LinkedIn Business.

Magento Components
Includes **Connection Manager, Source & Destination** components to facilitate connecting to and reading and writing to/from Magento.

MailChimp Components
Includes **Connection Manager, Source & Destination** components to facilitate connecting to and reading and writing to/from MailChimp.

Mailgun Components
Includes **Connection Manager, Source & Destination** components to facilitate connecting to and reading and writing to/from Mailgun.

Mailjet Components
Includes **Connection Manager, Source & Destination** components to facilitate connecting to and reading and writing to/from Mailjet.

Microsoft Planner Components
Includes **Connection Manager, Source & Destination** components to facilitate connecting to and reading and writing to/from Microsoft Planner.

Microsoft Teams Components
Includes **Connection Manager, Source & Destination** components to facilitate connecting to and reading and writing to/from Microsoft Teams.

Microsoft To Do Components
Includes **Connection Manager, Source & Destination** components to facilitate connecting to and reading and writing to/from Microsoft To Do.

MYOB Components
Includes **Connection Manager, Source & Destination** components to facilitate connecting to and reading and writing to/from MYOB.

OneLogin Components
Includes **Connection Manager, Source & Destination** components to facilitate connecting to and reading and writing to/from OneLogin.

PayPal Components
Includes **Connection Manager, Source & Destination** components to facilitate connecting to and reading and writing to/from PayPal.

Ping Identity Components
Includes **Connection Manager, Source & Destination** components to facilitate connecting to and reading and writing to/from Ping Identity.

Pipedrive Components
Includes **Connection Manager, Source & Destination** components to facilitate connecting to and reading and writing to/from Pipedrive.

Power BI Components
Includes **Connection Manager, Source & Destination** components to facilitate connecting to and reading and writing to/from Power BI.

PrestaShop Components
Includes **Connection Manager, Source & Destination** components to facilitate connecting to and reading and writing to/from PrestaShop.

Quickbase Components
Includes **Connection Manager, Source & Destination** components to facilitate connecting to and reading and writing to/from Quickbase.

RingCentral Components
Includes **Connection Manager, Source & Destination** components to facilitate connecting to and reading and writing to/from Sage Business Cloud.

Sage Business Cloud Components
Includes **Connection Manager, Source & Destination** components to facilitate connecting to and reading and writing to/from Sage Business Cloud.

Salesforce Pardot Components
Includes **Connection Manager, Source & Destination** components to facilitate connecting to and reading and writing to/from Salesforce Pardot.

SendGrid Components
Includes **Connection Manager, Source & Destination** components to facilitate connecting to and reading and writing to/from SendGrid.

Sendinblue Components
Includes **Connection Manager, Source & Destination** components to facilitate connecting to and reading and writing to/from Sendinblue.

ServiceNow Components
Includes **Connection Manager, Source & Destination** components to facilitate connecting to and reading and writing to/from ServiceNow.

ShipStation Components
Includes **Connection Manager, Source & Destination** components to facilitate connecting to and reading and writing to/from ShipStation.

Shopify Components
Includes **Connection Manager, Source & Destination** components to facilitate connecting to and reading and writing to/from Shopify.

Slack Components
Includes **Connection Manager, Source & Destination** components to facilitate connecting to and reading and writing to/from Slack.

Smartsheet Components
Includes **Connection Manager, Source & Destination** components to facilitate connecting to and reading and writing to/from Smartsheet.

Snapchat Business Components
Includes **Connection Manager, Source & Destination** components to facilitate connecting to and reading and writing to/from Snapchat Business.

Square Components
Includes **Connection Manager, Source & Destination** components to facilitate connecting to and reading and writing to/from Square.

Stripe Components
Includes **Connection Manager, Source** & **Destination** components to facilitate connecting to and reading and writing to/from Stripe.

SugarCRM Components
Includes **Connection Manager, Source & Destination** components to facilitate connecting to and reading and writing to/from SugarCRM.

SuiteCRM Components
Includes **Connection Manager, Source & Destination** components to facilitate connecting to and reading and writing to/from SuiteCRM.

SurveyMonkey Components
Includes **Connection Manager, Source & Destination** components to facilitate connecting to and reading and writing to/from SurveyMonkey.

Teamwork Components
Includes **Connection Manager, Source & Destination** components to facilitate connecting to and reading and writing to/from Teamwork.

TikTok Business Components
Includes **Connection Manager, Source & Destination** components to facilitate connecting to and reading and writing to/from TikTok Business.

Trello Components
Includes **Connection Manager, Source & Destination** components to facilitate connecting to and reading and writing to/from Trello.

Twilio Components
Includes **Connection Manager, Source & Destination** components to facilitate connecting to and reading and writing to/from Twilio.

Twitter Business Components
Includes **Connection Manager, Source & Destination** components to facilitate connecting to and reading and writing to/from Twitter Business.

Webex Components
Includes **Connection Manager, Source & Destination** components to facilitate connecting to and reading and writing to/from Webex.

WeChat Components
Includes **Connection Manager, Source & Destination** components to facilitate connecting to and reading and writing to/from WeChat.

WordPress Components
Includes **Connection Manager, Source & Destination** components to facilitate connecting to and reading and writing to/from WordPress.

WooCommerce Components
Includes **Connection Manager, Source & Destination** components to facilitate connecting to and reading and writing to/from WooCommerce.

Xero Components
Includes **Connection Manager, Source & Destination** components to facilitate connecting to and reading and writing to/from Xero.

Yammer Components
Includes **Connection Manager, Source & Destination** components to facilitate connecting to and reading and writing to/from Yammer.

YouTube Analytics Components
Includes **Connection Manager, Source & Destination** components to facilitate connecting to and reading and writing to/from YouTube Analytics.

Zendesk Components
Includes **Connection Manager, Source & Destination** components to facilitate connecting to and reading and writing to/from Zendesk.

Zoho Components
Includes **Connection Manager, Source & Destination** components to facilitate connecting to and reading and writing to/from Zoho.

Zoho Books Components
Includes **Connection Manager, Source & Destination** components to facilitate connecting to and reading and writing to/from Zoho Books.

Zoho Desk Components
Includes **Connection Manager, Source & Destination** components to facilitate connecting to and reading and writing to/from Zoho Desk.

Zuora Components
Includes **Connection Manager, Source & Destination** components to facilitate connecting to and reading and writing to/from Zuora.

Zoom Components
Includes **Connection Manager, Source & Destination** components to facilitate connecting to and reading and writing to/from Zoom.

Timing and Automation

Azure Functions
Execute Azure Functions using HTTP triggers and retrieve the response from the functions.

SSH Task
The SSH Task can be used to create an SSH Connection.

Time Zone Conversion
A transformation component for converting a date column from one timezone to another.

Timer Task
Pauses package execution between Control Flow items through 3 Pause Modes: Fixed Time, Wait Until, Wait Until Variable.

Windows Command Task
Run Windows and PowerShell commands directly at the control flow level.

Test and Simulation

Dummy Destination Component
Works as a sink for SSIS by receiving incoming rows like a typical destination component, but it does not perform any actual writing.

Security Management Components

AWS Secrets Manager Components
Establish connections with AWS Secrets Manager and perform actions like get, update, delete, create, and restore on AWS Secrets..

Azure Key Vault Components
Establish connections with Azure Key Vault (Gen1 / Gen2) and perform actions like get, set, delete, and purge on Azure Secrets.

About KingswaySoft

KingswaySoft is a leading provider of high-performance data integration solutions using SSIS as the ETL platform. Organizations from more than 100 countries rely on our solutions to drive their business data efficiency.
